

Youth Baseball to Die In Belle Glade?

The kids want to play but the adults don't. Over 300 boys have signed up for organized baseball. Twelve adults have signed up for the 36 coaching, umpiring, and groundkeeping jobs. "Unless at least 36 adults are willing to help with the program," said Ray Caruthers, "there will be no organized baseball this year in Belle Glade."

Caruthers is president of the Glades Youth Baseball Inc., which sponsors baseball in Belle Glade.

Seventeen sponsors, who furnish uniforms and equipment, are willing and ready to do their share. The boys are ready to go, and the schedule of games starts May 8, if the whole thing doesn't fall apart before it gets started.

Marina Expansion Will More Than Double Capacity

The Belle Glade Marina will more than double its present capacity with the opening of new campsites on the southern island which has been dredged to continue to Belle Glade Marina tradition of "every campsite on the waterway."

In the picture at the left, the present facilities are on top, with five slips for campers to park their boats in their back yards.

The new portion, on the bottom of the photograph, contains a protected entrance, a barge and three slips for back yard boating.

Rentals of campsites for the past six months was \$6,212 with the biggest volume in February when \$1,769 was collected. The present Marina facilities represent an investment of approximately \$75,000 with most of the work, materials, and time being contributed to the project by individuals. The Marina was a Chamber of Commerce project for many years and turned over to the City as a revenue making operation.

Police Chief, Charles Goodlett has worked with the project for over 11 years and is presently directing the construction of the southern island.

The new portion of the park will represent an additional investment of approximately \$100,000. For this purpose \$35,000 in state funds have been allocated through the South Florida Flood Control District. These funds will be repaid with 10% of the gross revenue of the facility. Frank Anderson, city finance officer, reports \$774 has been paid and \$461 will be paid from revenues last quarter.

The Marina is expected to be an increasing drawing card for visitors to Belle Glade. The protected site, with two fish

Cancer Crusade To Start Here Saturday

A kick off coffee for the fund-raising Crusade for the American Cancer Society in the Glades area is at 10 a. m. Saturday at the Holiday Inn.

The Senior Class of Belle Glade High School started contributions with \$25 in the memory of Mrs. Sallie Corbin, said J. P. Jones, chairman of the Glades Crusade.

Area chairman are: Leo Cranford, Belle Glade, Ed Bobbitt, Special gifts chairman, Albert Snyder, South Bay, John Rogers, Pahokee and Don Adams, Canal Point.

Boy Scouts will aid in the drive, collecting at grocery stores Saturday, April 29.

With its 1967 educational and fund-raising Crusade, the American Cancer Society is in the second year of a five-year intensified educational program to "save more lives from cancer now."

The program focuses on the detection and control of six of the most common sites of cancer — uterine, breast, colon and rectum, oral, lung and skin.

The 1966-67 Adult Painting Class Annual Art Show is on display this week at the Florida National Bank.

The show offers an unusual variety of subject matter and individual approaches to painting," said Mrs. Henry O. Earwood, instructor. "Belle Glade should be proud of her budding artist."

Mr. James Rutherford, Youth Director of the City of Boca Raton, will meet with the local group to discuss the highly successful program which has been carried out in his community and to answer questions.

All interested individuals or groups are invited and urged to attend this meeting. The youth of our community urgently need a plan and supervised program for recreational and creative activities. They deserve your help.

The High School Band, composed of 85 members, will perform numbers for which they were recently judged superior in their district contest. This in the 10 successive year the band has earned a superior rating in district contest. In addition to the contest numbers the band will perform an overture to "The Sound of Music" and "Highlights of The West-side Story."

Miss Joyce Bradford, cornetist, will be featured as soloist in Leroy Anderson's "Trumpets Lullaby."

Goodlett Gets Thanks

The Belle Glade Rotary Club Friday will express their appreciation to Police Chief Charles Goodlett at their regular meeting Friday.

The club will present Goodlett and his department with the following letter:

Dear Chief: During these times we are living in, it is so much easier and convenient to find fault and criticize, than it is to look for the good. It is also much easier to raise our voices, when we don't like the way something is being done. Silence is usually construed nowadays, to mean that we are either satisfied with the situation or lackadaisical enough, that we don't care.

Charlie, we are taking this opportunity to very strongly express to you and your department, that we do care. We also deeply appreciate what you have done in the past, are doing now, and will be in the future for our community.

During these last few hectic months, few people have been fully aware of the "power-keg" conditions, existing in our town. Even fewer people know of the many early hours you spent before daylight working in and out of the different elements or the tireless hours late into the night, meeting and working with different factors, all the while, quietly serving our community and keeping the lid on

the "keg." Much of our future efforts may go unnoticed and thanks to many but we, as a club are proud of you and your department. Warm congratulations for a job well done!

Sincerely,
Belle Glade Rotary Club.

South Bay To Build Post Office

SOUTH BAY — The City of South Bay was low bidder for the construction of a new U. S. Post Office in South Bay, Congressman Paul G. Rogers has announced.

Acting Postmaster Thomas A. Williams said plans for the new building slated to be ready for occupancy by November 1 1967 will provide individual mail boxes for 400 subscribers. This will more than triple the capacity of the present post office.

The new building, which will be constructed at an estimated cost of \$16,500, will be located just east of City Hall and in front of the two municipal tennis courts on State Road 80.

Plans for the building and the advertising for bids on the building will be discussed at the next regular City Commission meeting Monday.

Williams has been the acting postmaster since last September.

Rogations Sun. To Be Celebrated Here April 30

Rogations Sunday will be a protected entrance, a barge and three slips for back yard boating.

The Rogations observance was formulated by Bishop Mamertus of Vienna and the observance has been continuous since that time and is celebrated three days preceding ascension day, said Rev. Paul L. Thompson, Vicar of St. John the Apostle.

"Rogation," he said, acts of Thanksgiving and intercession for the fruits of the soil. Prayers are offered for the fruitful season, desirable weather conditions and responsibility in the stewardship of the soil of those who till it.

"In the history of the church these are the only prayers and observances which have never died out even in times of reformation and revolt. The ceremony is very short and precisely the same as were performed when they were formalized."

Thompson will be able to arrange for the blessing to be performed on their farm by contacting Father Thompson or may indicate a symbolic offering of their soil and produce to the Belle Glade Marina where ceremonies will be performed at 4:30 p. m. Sunday, April 30.

Following the Marina ceremonies a "luxurious and generous sea food dinner will be served to all guests."

Members of the Glades Agricultural Community are invited to the Marina dinner. There is no fixed charge for the dinner. Father Thompson said. The event will be sponsored by contribution.

Fresh seafood will be prepared and the menu includes kalam, oyster on the half shell, steamed shrimp and smoked mullet. The cost of preparing the dinner is estimated to be approximately \$5 per person.

The dignity of the earth is often overlooked, Father Thompson said, and this inauguration of the annual observance of this ancient tradition by St. John's will be tribute to the bountiful supply the earth gives in this country.

Bass fishing was fair with most of them being taken in the late afternoon. Some of the lucky fishermen were Jesse Cockrell, Jimmy Taylor, Wallace Lutz, Roy Litchfield and D. W. Weyland.

Joe Revels, Belle Glade caught a 7 1/2 pounder in Steins Canal using live bait.

Fishing should be excellent this weekend for the bream and shell crackers due to the full moon. There are plenty of bream beds in Pelican Bay, Long Point, near Ritta Island and Kraemer Island.

Slim's Fish Camp

Bass, speckled perch and shell crackers are being caught in the report from J. Mark Camp.

The specks are going out and the shell crackers coming in. Several limits of shell crackers have been brought in each day.

Mr. and Mrs. Fears from Ohio brought in 22 bass fishing with Herbert Waters.

Mark Challancin went out one day and caught the limit in bass.

Rev. Dasher from Miami caught 45 specks on Tuesday.

THOUGHT OF THE WEEK

Our remedies oft in ourselves do lie, which we ascribe to heaven; the fated sky gives us free scope; only, doth backward pull our slow designs, when we ourselves are dull. —Shakespeare.

DO-IT-YOURSELF SAVINGS

The Sevierville, Tennessee, Tri-County News, called the attention of its readers to a publication of the Colorado Farm Bureau which recently reprinted an article from the Denver Post by columnist Monk Tyson suggesting ways for housewives to trim their grocery bill by buying direct from the farmer. Mr. Tyson decided to pursue his own producer-consumer campaign:

I found a farmer who sold me 100 pounds of potatoes for \$2. That's less than half of the store price. Of course, Mamma's going to have to peel that sack of spuds I brought home. She'll have to boil them and mash them — when we want them mashed. She won't be able to dump a container of powdered spuds in to the utensil, bring it to a boil, then serve."

Next he bought a couple of chickens: "Place chickens, an ax, and carving knife in Mamma's well-manicured hands. Mamma will behead the chickens, pluck them, and carve them. She'll be delighted when she learns you save five, maybe ten cents a pound by buying the poultry on the farm."

The same money-saving strategy, he reports, can be applied to other items — corn, for example. You can nubby an antique grinder so that "Mamma" can shuck the corn, shell it and grind it into meal. If the grinder is adjustable, you can grind some wheat into meal.

If we are serious about beating the costs of inflation, this is one

way to do it. We could also take up weaving and the other arts and crafts that made the early American families virtually self-sufficient. Chances are, it would not be long before we looked on today's miracle of mass production and mass distribution with new respect and appreciation.

From the Dallas, Ore., Observer: "We see that the U. S. Supreme Court over-ruled a New York state law barring Communists from teaching in state colleges and universities. In the decision (5 to 4) the Court said the rule was a violation of the rights of the individual. Unless we're mistaken a Communist, by definition, advocates the overthrow of our government. At what point does national security become more important than individual rights?"

GERMANTOWN, OHIO, PRESS: "Japan, vanquished a quarter of a century ago, is today one of the most rapidly advancing nations in the world. The Japanese have a desire to excel, they have a desire to create, to gain recognition for their nation. They not only work to earn, they work to produce, for they know there is no substitute for production. In America it is no longer necessary to work hard to earn a wage, or to keep a job. In many industries the Japanese are leading America."

EXECUTIVE VICE PRESIDENT

Moving The Mails

Postmaster General Lawrence O'Brien deserves a good word from the public for suggesting that the Post Office Department is in need of a fundamental overhaul to make it more businesslike. It is not often that a federal officialholder admits that Big Government isn't the model of efficiency. What O'Brien suggested is that the Post Office Department be replaced by a non-profit government corporation, with a sweeping grant of administrative power provided by the Congress and the President. He pointed out that the Department currently has no effective control over the postal system, with respect to work loads, postal rates, salary schedules and physical facilities. To make any change, the Post Office Department has to secure congressional approval, which is not easy.

It certainly is true that the Post Office Department is subject to all manner of outside influences and controls. From its establishment the Department has been regarded as a political operation. Postmaster terms have been chosen as political pawns. As a result, efficiency has suffered.

In the past, when the country was not so populous, the inefficiency of the Post Office Department was not so apparent. Indeed Americans whose memories go back to before World War II must realize that there were two mail deliveries a day in most neighborhoods. By year, however, postal service has deteriorated. Though this is the age of jets, the Post Office Department operates at the speed of the covered wagon.

This is an intolerable condition. The high-speed, complex America of today requires first-class communication. The investor-owned telephone service furnishes this kind of quality communication in its field. But

THE FARM FRONT

Reason to Sympathize

By Doyle Conner

I have been observing, with some trepidation, the mounting discontent among American farmers brought about by the severe decline in farm prices.

This discontent runs deep and differs from the usual grumbling over prices. There is a new and disquieting — undercurrent to this unrest among farmers. They seem to feel that they must fight for themselves in order to get the prices they want.

I do not condone the militant tactics recently exhibited by the National Farmers Organization. I find a great deal of reason to sympathize with the plight of the farmer.

Prices received by farmers during February were down to only 74 percent of parity. There has been only one other month since 1934 in which prices have been so low in relation to the prices of things farmers must buy to produce their crops and livestock.

In the last 20 years, the hourly earnings of industrial workers have increased 123 percent, and corporate dividends are up 232 percent.

Net farm income, compared with 20 years ago, is down five percent. In 1966, the net income of farm labor, including management, averaged \$1.60 an hour, as compared with an average wage of industrial workers, management excluded, of \$2.71 an hour.

Today, corn brings about \$1.26 a bushel throughout the nation. In 1947, it sold for an average of \$2.25 a bushel. Wheat, including the value of certificates, brought an average last year of \$2.14. It sold for \$2.29 a bushel in 1947.

While the overall price of wheat has declined during the past 20 years, the price of bread was rising.

During the past 20 years, the price of beef cattle has risen. Farmers received \$21.60 per hundredweight, as compared to \$22.20 per hundredweight 20 years ago.

Retail food costs are now about one-third higher than they were 20 years ago. Americans spend a smaller part of their incomes, 18.2 percent, for food than any other people in the world.

The farmer has begun to feel that, by receiving less and less for what he produces, he has been subsidizing consumers.

I fear that, unless this sharp decline in farm prices is halted, it will imperil food abundance in the United States and severely restrict this country's participation in the world war on hunger.

Some agricultural economists predict food reserves will be more valuable than gold to the United States within seven or eight years as a result of the mounting world food and population crisis.

They have posed the question, "Just how long the United States can produce an abundance of food and fiber for our own people, unless our producers can receive reasonable rewards for their production?"

Farmers simply want a larger share of the economic pie. They feel they are being taken advantage of and many are convinced that society is against them.

It is not that the current farm unrest is temporary. There are indications that some real farm strife is ahead, and that farmers are ready to fight for what they want.

Too Late To Classify

By Russell Kay

You may not realize it but shopping today is costing you plenty in increased living costs. Every article stolen from a merchant in your community increases the price the honest consumer must pay for his merchandise.

The FBI reports that shoplifting arrests have increased 79 percent in the past five years and points out that three times as many shoplifters are not caught and their activities are costing the consumer millions of dollars in increased living costs.

Shoplifting is costing merchants over three million dollars a year. Merchants work on a small profit margin such as supermarkets find that for every \$55 profit it must increase sales \$550 to make the loss. Imperative markups to help offset such losses you are called on to pay.

And who are the shoplifters? Believe it or not, fifty percent of them are teenage delinquents. They are not from across the railroad tracks, or are they so called underprivileged youngsters, but some of the largest middle class or well-to-do families. Kids who have allowances and every advantage but engage in shoplifting.

Being teen-agers the law in most states does not permit them to be in public places. They are afforded every protection and are free to laugh at the law and continue to turn the postal service over to private enterprise — to a profit-making corporation, that is. One can be sure that such a corporation, if it knew its earnings would go up in accordance with the rendering of speedy service, would see that the customers were satisfied.

At present the customers of the Post Office Department are very unsatisfied. And unless there is some radical change in the postal service, postal service will come close to collapsing in the United States. More and more mail is being put into the system without improvement in the system's handling capacity.

Seriously, it is tragic that private enterprise isn't given a chance to carry the mails. The public one can be sure, would be glad to pay sensible postage rates if it knew that a letter or package would be delivered on time. Americans are accustomed to paying for service, and the overall pattern of commercial services shows that citizens will pay what is necessary to get quality performance.

Big Government has had its chance to move the mails on a timely basis, and government has failed. It is time that the business-minded investor and let business executives work out ways to get mail from one city to another at a speed compatible with the jet age.

why does America observe law day?

A favorite form of communist propaganda is a public display of force such as the parades of military armor held every year in Moscow's Red Square. Under communism, the state is all powerful and individual rights are at the disposition of the government. These parades remind the people of this.

In America, life, liberty, and the pursuit of happiness are inalienable rights, protected by law. If, in any way, respect for the law is weakened, the safety of our rights is endangered. This could be heartening to international communism which thrives where law is weak. Only so long as our respect for law remains high can the rights granted us in the Constitution remain secure. This is one reason why we observe Law Day U.S.A. on May 1.

LAW DAY USA - MAY 1

I am sure that they may have life, and have it abundantly. —(John 10:10)

Let's forget the past with its failures or sorrows. The dark clouds of limitation fade away. Enjoy the present, so that we may be filled with life, love, wisdom, peace and prosperity. Let's live abundantly for God's blessings flow to us from His bounty. Live in the awareness of God's presence and know that we are forever one with Him in a state of abundance, from whom all blessings flow, through whom all needs are met.

Imagine that! It's the horse you said you liked, and he likes you, too!"

Uncle Dan from Doolie Says:

Dear Mister Editor:

The fellers at the store Saturday night was giving some information on the education business. On account of most of us didn't get past the 7th grade, we ain't had this subject on the agenda until now.

But the storekeeper's old lady was a school teacher and he's been picking up a little here and yonder about these matters.

He reports that everything is gitting super complicated since they come up with this thing they call the "New Math." His old lady told him they ain't got no schools now that ain't at least rated Class A but it didn't mean nothing. They go right on up to Class AAA and after that they call 'em by a new name, like 10-A. And to be like a school, the school got embarrassed, the school people got together and changed the numbers system every year or two.

Ed Doolittle said his daughter, the one that works in the city and teaches "lunch," started out on the grading system of A or B or C and letters like that, but afore she got through high school they come up with a system called grading on the curve, which was like separating the dumb and the smart without knowing the difference. He said he recollected once he'd heard that a "excellent" rating on their choir, but it weren't till a month later they found out that "excellent" was not too bad, not too good. "Outstanding" was worse, and "superior" was somewhere in the middle.

The storekeeper was of the opinion they won't no sense in giving a kid a report card to take home on account of the kid didn't know what it meant and his parents knowed less. Zeke Grubb said he reckoned the schools was gitting superdupper to keep up with the Great Society. He reported he had seen in the papers where them folks in Washington was now working on a program called the "Freedom Budget" that will cost \$185 billion and it would guarantee everybody a certain income and the same kind of houses and schools. He said that wouldn't be a like a blacksnake will get on the curve with the feller biting and scratching to make a good salary.

But he said, that ain't no fire with ambition and takes to work like a cat takes to a dog, said it were all the same to him. He reported that what he made off his little place, his income was the same afore taxes as it was after taxes. The only thing he was allowed, he didn't know he was so pure and miserable until the Great Society come along and showed him what a mess he was in.

Yours truly,

Uncle Dan

Is This Trend Dangerous?

By Lewis Llewellyn

Is there danger in the rapidly changing attitude toward moral standards in this nation? In California, the statewide church council of a major denomination has passed a resolution asking that laws against homosexual acts be revised. The church group favors permitting, without any legal penalty, such acts committed in private between consenting adults.

STUDENTS TAKING DRUGS

A cross the country, it has been revealed that approximately 500 students at Princeton University — many of them being in the top rank academically — have been taking drugs such as LSD and marijuana.

Read Acts 17: 1-9

"These are the men who have turned the world upside down and have now come here. (Acts 17:6, Phillips)

In a yacht harbor near Chicago there is a sign with these words: "Cause no wake." This means that boat pilots must go slowly so that hardly a ripple will be made in the water behind their boats. Those who use the harbor must not disturb the serenity of the situation.

This is a good rule for the harbor. But there are many people who seem to have adopted it as a philosophy of life. They believe in keeping things as they are—never disturbing the status quo. They believe in keeping their privileges to themselves, sharing with no one, Christians are about as guilty of this attitude as anyone else.

Early Christians turned their world upside down. Today some things in our world need to be explored, changed, and improved.

"Cause no wake" is a good sign for the harbor, but it would be a tragedy for any Christian or any church to obey such a sign in living the faith.

PRAYER Help us, O Lord, to constantly subject our lives as well as society to critical scrutiny. Where revolutionary action is required, give us the courage to act in the love of Christ. In His name we pray. Amen.

THOUGHT FOR THE DAY

Christians need to be among those who act, not merely react. Jesse H. Roberts (Illinois)

Meeting Temp. in South Bay School

While the dean of students says that he considers this "an extremely serious matter," a number of the students have stated that they intend to continue taking the drugs. A few said that they were addicted, feeling a compulsive need to continue.

Dr. Timothy Leary, former university professor who now claims to head a "religion" using LSD to induce insights beyond the realm of ordinary human experience, says that he has tested two other drugs which are more powerful than LSD. Where will this end?

While drug addiction was apparently not common in the times when the Bible was being written, sexual misconduct was, among certain groups of people.

Of one group, the Bible says, "protesting themselves to be wise, they became fools . . . wherefore God gave them up to uncleanness through the lusts of their own hearts . . . God gave them over to a reprobate mind."

Can the people of a nation depart from Scriptural standards of conduct and not suffer the consequences? Can an individual turn his back on God and God's laws governing our behavior and escape the penalty of his deeds? WRATH OF GOD REVEALED

The Bible says, "The wrath of God is revealed from heaven against all ungodliness and unrighteousness of men." But God also holds out to us the remedy for sin and uncleanness. The Gospel of Christ is "the power of God unto salvation to every one that believeth."

Detalles de la Historia De America

Su Origen INDIO

Prescindiendo de los esquemas habiendo las regiones polares del Norte, y de los patagones, habitantes del extremo sur, se han dividido los indios americanos en ocho grandes grupos, basados en su cultura, que ocupaba el territorio americano: la californiana, que ocupaba el occidente de la América Septentrional; la mejicana, que vivía en territorio mejicano y centro americano; la caribe, originaria de las Guayanas y extendida por el archipiélago de las Antillas; la peruana, de los Andes; la araucana, o chilena; la pampa, de la parte oriental y llana de la América del Sur; la guaraní, que se extendía entre las cuencas del Plata y del Amazonas.

En la historia antigua del mundo americano solo aparecen dos puntos luminosos, el imperio de los Incas peruanos y el de los Aztecas del antiguo Mejico, rico imperio este último bajo el Emperador Montezuma que fue conquistado en 1519 por el capitán español Hernán Cortés.

DESCUBRIMIENTO DEL NUEVO MUNDO

A fines del siglo XV era España la nación más potente y vigorosa de Europa, su población aumentaba prodigiosamente, su industria y comercio se desarrollaban, lo mismo que las artes y las letras. La raza ibera, modificada por la mezcla de sangre latina y sangre goda, recuperaba sus energías también con sangre arábica y a la española durante siete siglos. Solo en España encontraron atención y ayuda el inmortal marino genoves Cristóbal Col-

Billy Kirk

Planning to attend Orlando Junior College next year is William Ralph Kirk.

Billy has been active in the Junior Civitan Club since his junior year.

He loves sports, especially baseball and tennis. On the baseball team he is right fielder. If he isn't involved with these, he is enjoying skiing, fishing, and surfing.

Born in Belle Glade, Billy has attended school all twelve years, here. He is employed at Scarboroughs. Billy and his father, Mr. Ralph Kirk, live on Royal Palm Drive.

Billy is usually seen driving a 1964, Blue Impala. When asked about his preference of car, he replied that a XKJ Jaguar (yellow) would suit him just fine. His favorite color is green and his best subject is drafting. The main dislike of Billy is "people who pretend to be something they aren't."

Students Of The Week

Kathy Barron

Active in many school organizations is Kathy Agnus Barron. She is president of the Pep Club and vice president of the Royal Order of Terific "Seniors." Other activities include being Teen Town treasurer and a member of student council.

The senior play and the R. O. T. C. trip are coming up soon. Kathy is portraying Prudence Melvin a "gushy," small town, real estate tycoon in the Senior Play.

As vice-president of the R. O. T. C. Kathy is helping Troy Martin hold the reins and guide the club toward its goal making the Senior trip to Nassau. Earlier this year Kathy was chosen as the "Most Dependable" senior. The Pep Club has just painted and distributed new trash cans in an effort to clean up the school campus.

Kathy's favorite pastimes are writing letters and cooking. She spends most of her time with Connie Van Camp with whom she plans to attend Palm Beach Junior College this

BILLY KIRK

With humanities, English, and geometry keeping him busy, Billy has little time for curricular activities.

Hoping to continue his education in Orlando, Billy plans to go into business management. He plans to continue his job with Scarborough's through the summer in order to help pay part of his college expenses.

KATHY BARRON

fall. Though Kathy can be seen riding around in a white LTD, she would prefer a white Mercury Cougar. Her favorite song is "To Each His Own."

Innocent, prent people are Kathy's pet peeve. Kathy came to Belle Glade from Miami. Her father is a sod farmer, her mother a housewife. She has four older brothers and one older sister.

Aggie Chosen As Harvest Queen

Winner of the annual Talent Contest was Miss Joanne Harris, with Aggie Gressinger second.

Kill this pellitory weed in sugar cane. Use Atrazine. Here's how:

When you see pellitory weed starting to grow, apply Atrazine 80W herbicide, plus a little surfactant. You'll clean out infestations of this winter annual fast and effectively . . . without hurting cane.

Atrazine is safe to sugar cane. It will not injure your crop when you apply it as directed on the label. And since it's non-volatile, there's no danger of drift to adjacent, sensitive crops.

Even though Atrazine has proved to control pellitory at any stage of growth, early treatment assures best results. With pellitory under control early, you grow more sugar cane per acre.

That's because Atrazine prevents

pellitory from interfering with sugar cane tillering. Also, Atrazine helps make soil moisture and nutrients available for your cane, and not for pellitory weed.

So plan now to grow the maximum tonnage of sugar cane from each acre you plant this season. Just use Atrazine to control pellitory weed this winter.

Community Youth Group Formed At Okeechobee Center

A group of young people, ranging between the ages of 16 and 25, felt the need, as well as the desire, to raise the standards of their community.

Thus originated the organization, "UP WITH PROGRESS" of Okeechobee Center, Belle Glade, Florida.

The group was very much

enchanted with the outcome from donating Easter Baskets to needy children in their community, therefore, they have considered a much greater task of setting up a miniature library for the use of any interested individual, whose time and personal facilities would not allow this activity otherwise—in this we are soliciting your help.

Any information, materials, books, periodicals, etc., will be greatly appreciated.

Anyone sympathizing with cause may contact Miss Celester Hollingsworth at H-1 Bethune Drive or call 996-2513 between 8:30 a. m. and 5 p. m.

You are cordially invited to attend our meetings, held Thursday nights, 7:30 p. m., at Okeechobee Center Recreation Hall.

Seniors Will Present Class Play

"Smilin' Through," the fantastic comedy by Allan Langdon Martin, is the story of an ancient tragedy visited upon the heads of the younger generation.

It deals with a tragedy fifty years back, when a rejected

sailor shoots the woman he pretends to love on the night of her wedding. As the years pass a boy and girl of the younger generation of these families fall in love.

How the spirit of the slain girl comes "Smilin' Through," to help the young lovers make up the main theme is one of the thrilling highlights of this sensational comedy-drama.

It has in it all of the romance and fantasy of a powerful love drama and all the glittering humor of a rollicking comedy piece. "Smilin' Through" the world famous comedy-drama will be presented by the Lake Shore High Senior Class April 21, at the school's gymnasium.

Carolyn Coleman

Please don't forget the play tomorrow night.

A few months ago, a man came into a Datsun dealer in California, and asked his 1964 Datsun pickup. During this time he had put in 4 changes of spark plugs, a new tire now and then and oil changes whenever he got around to it. The dealer gave him a Datsun's minor tune up and some other services which cost \$32.00, and made it look like new. Today that Datsun has over 175,000 miles on it and is still going strong!

Senator Thomas Introduces Bill On Agriculture Land Assessment

A bill designed to eliminate inequities in the classification of land as agriculture and to develop a more realistic assessment of bona fide farm land was introduced Wednesday in the senate by State Senator Jerry Thomas. Lake Park chairman of the senate agriculture and livestock committee.

Thomas said the bill is one of the most important pieces of legislation which will be introduced during the current session of the legislature to eliminate pressures against the green belt law due to the classification of areas inside urban developments as farm land. The legislation will provide relief to bona fide farmers who have been subjected to excessive assessment of agricultural land in a number of counties where assessors have treated

non-agricultural land as though it was being used for agricultural development.

The senator, who is the first Palm Beach county legislator to serve as chairman of the agriculture committee in either the house or the senate, said the bill would create an agriculture zoning board in each county in the state. Members of the board would be the county commissioners, county tax assessor, and county agricultural agent. The chairman of the county commission would also serve as chairman of the zoning board.

Thomas said the measure will eliminate such inequities as the Coconut Grove classification in Dade County, as it provides that land contiguous on two or more sides by urban residential or business development may be zoned urban by the zoning board.

Lead Development In Other Direction

What happens to Florida industry if peace suddenly "breaks out?"

With much of Florida's developing industrial firms engaged in military electronics, aerospace and other phases of national defense, Florida Trend Magazine polled a number of the state's business leaders concerning their outlook for what might happen if the Vietnam war suddenly ended.

These are the findings reported in the April issue of the business and financial publication:

In the highly unlikely case of a sudden end to hostilities there would be termination of many contracts.

Some of these contracts would be revised immediately as the United States is hot expected to engage in massive

disarmament any time in this century.

A slackening in defense orders would permit deferred production of electronic and space equipment for special purposes.

Demand for the types of products manufactured in Florida will be augmented by the return of peace as pent up consumer demand for these products is released;

Product and production improvements developed under military urgency will permit peacetime efficiencies which will accelerate earnings.

There was general agreement that the process of changeover from military to civilian production would be rapid since most of the production today has civilian as well as military uses.
